Hi,

Please have Sonja try again.

I needed to update the table tblSecurity.

Thanks,

Kip

Hi Kip,

Sonja Farak at Amherst site is not able to access the AmherstDrugLab database. She gets an error message stating that she does not have permission to access the Amhersdruglab application. I looked at it and it does not seem to be a local rights issue. Could it be an enternal error message?

If there is anything I can do let me know.

Thanks,
-Eric

Eric,
I called Jim and he is all set now.
I told him to run the exe runbostonfromamherst.exe

Thanks,

1

Kip

Kip,

I am trying to launch using the shortcut Q:\APPS\DRUGLAB\STARTDRUGLAB.EXE from a Citrix desktop. Are you saying to unzip that file into Q:\APPS\DRUGLAB? It looks like those files are already there.

Eric,

Good morning.

Rename this file to vfpdlls.zip then upzip the contents to the same directory where Citrix is trying to start the Druglab application and it should work.

Thanks,
Kip

Hi Kip,

Are you the contact for the Druglab application that Jim and Sharon in Amherst use? If so, they were migrated to EHS last week and now the druglab application is not launching on their desktops. The local app is OK as I understand it, but not the one through the Menu folder at SLI.

I tried setting up a Citrix connection for them but receive the error message that the app cannot find the Foxpro support libraries. Any ideas?

Thanks,
-Eric
